

ORTHOPEDIC MRIs AT ORLIN & COHEN ARE JUST BETTER: HERE'S WHY.

1. The region's best orthopedic MRI subspecialist.

Orlin & Cohen's Steven Sharon, M.D., is fellowship-trained, has over 15 years' experience and has read over 300,000 orthopedic MRIs.

2. Next-level orthopedic expertise.

Unlike general radiologists, Dr. Sharon is a subspecialist, which means he concentrates exclusively on orthopedic MRIs.

3. Collaborative team approach.

Dr. Sharon works closely with your orthopedist to ensure you receive the best care.

4. We know your orthopedic story.

Your medical history is vital to a successful MRI. Your Orlin & Cohen electronic health records are at Dr. Sharon's fingertips when necessary.

5. Comfort is priority one.

Our state-of-the-art technology reduces scan times and covers as little of your body as possible to minimize that claustrophobic feeling.

6. Here, one size doesn't fit all.

Dr. Sharon has perfected the art of MRI sequences so you can be confident your Orlin & Cohen doctor receives the necessary information.

Immediate appointments are available:

Speak to your office receptionist or call 516.536.2800 to schedule yours now.
